NOLEM

BIOGRAPHY / 2026

NoleM is a Swiss alternative rock project launched in 2021, following nearly a decade with Progstone, whose journey included performances at Greenfield and Caprices festivals.

Personal and introspective, NoleM explores an eclectic, increasingly progressive sound. Quiet, atmospheric passages meet heavy, sometimes extreme outbursts, with a growing interest in electronic textures and synthesizers. Influences range from Faith No More to Radiohead, with intensity and sensitivity at the heart of the music.

After four EPs released in 2023-2024, the debut album Transition arrived in September 2024. More recent releases, including Silent Town, Pigs and the latest single Sweet Rain, reveal the project's range: from intimate, understated songwriting to darker, more explosive territory. NoleM also creates original artwork, connecting the music to a distinctive visual world.

The electric live show now brings together five musicians: Melon on lead vocals, Monn on lead guitar, Dann on rhythm guitar, Eric on bass and backing vocals, and Simon on drums. An acoustic format with guitar and vocals, cello and cajon offers another side of the same universe.
